Preoperative Nursing Training at BASR

BASR’s continuing education program, in cooperation with the Belgian organization (APEFE) concerned with the advancement of education and training overseas, organized a training titled “preoperative nursing” at BASR. The training was designed and implemented by both Ms. Patricia Bay and Ms. Fanny Lambert and lasted for 4 days in which participants completed 20 training hours.

The training aimed at updating the participants’ information and keeping them abreast with the latest scientific developments used in this field and how to apply them in order to raise the level of nursing care provided to beneficiaries.
A number of nurses from other institutions participated in the training such as Al Ahli Hospital - Hebron, Palestine Military Hospital - Bethlehem, Holy Family Hospital – Bethlehem, and the Military Medical Services- Bethlehem.

This training course is part of a series of courses organized by the continuing education program at BASR in collaboration with its partners to build capacity and facilitate the exchange of scientific and practical experiences of the cadre and workers from other institutions to improve the overall quality of health services and elevate the level of services provided at Palestinian health institutions.
