BASR, with the support of CBM, has concluded 6 training courses, held in the months of May and June in both Bethlehem and Hebron, on administrative and organizational skills. Those courses targeted 78 participants from people with disabilities and staff of local authorities and institutions working in the field of disability.

These trainings aimed at building the capacity of people with disabilities, self-help groups and the cadres of local authorities and relevant institutions on the topics of management and strategic organizational planning, project management, and networking. In BASR’s view, the
newly acquired skills will enable the recipients to take responsibility for disability issues in their communities to ensure equal enjoyment of their rights in line with UNCRPD. The training comes as part of this project "Strengthening the overall policies and practices to ensure equal rights for persons with disabilities in the Palestinian society".
